

Cleantech Forum Europe

Antwerp

May 14-16, 2018

Join our annual gathering!

Cleantech Forum Europe is the industry's premier gathering convening approximately 375-425 of the leading financial investors, multinational corporations, entrepreneurs, technology support firms, and government agencies from all across Europe and the globe.

Our forums help our audiences chart the future and filter the noise, allowing you to concentrate on the people and topics that matter most. We aim to showcase the trends to watch out for and the innovation companies that illustrate them. The Forum agenda will cover a wide range of topics from across the cleantech theme highlighting innovative business models, emerging technologies and market trends.

Now in its 14th year, Cleantech Forum Europe continues to be the leading place to create top level connections in the cleantech ecosystem with delegates attending from over 25 countries in Europe and from across the globe.

A 14 year history

Flanders Cleantech Association

The **Flanders Cleantech Association** brings together the Flemish cleantech companies and supporting players in a robust Flemish Cleantech Cluster, pursuing maximum standing abroad in influential networks, new markets, potential investors and cleantech innovation projects.

FCA maintains global contacts with other cleantech clusters and associations.

Together we carry out a technology gap analysis to draw out the opportunities for collaboration with our Flemish cleantech companies. The collaboration between a Flemish and a foreign cleantech company starts with a carefully defined and 'safe' subproject, which allows both partners to get to know each other, resulting in mutual trust and a readiness in the long term to embark upon a more profound partnership.

VITO

VITO is a leading international research and consulting centre. It provides knowledge and technological innovations that facilitate the transition to a more sustainable society. We do this in the areas of energy, chemistry, materials, health technology and land use. We unite different parties in a sustainable value chain. Through cooperation, expansion and development of expertise we are able to make smarter use of existing resources and develop new ones.

Technology must be viable and cost-effective. This calls for partnerships between research centres, commercial parties and the government, who together create impact on the transition to sustainability.

VITO is the driving force by providing substantive knowledge, innovative processes and business models.

VITO makes the connection between research, government and market, between knowledge, policy and business in order to create impactful changes.

VITO. Vision on Technology for a Better World.

Key activities

Cleantech Forum Europe is a three day event consisting of the following activities:

Networking

- Opening Night & Closing Night Receptions
- Investors' Dinner (Invite Only)
- Forum Dinner & Awards

Demonstrated Benefits for Sponsors:

- Develop and create value for your organization by accessing the leading cleantech entrepreneurs, top-tier corporate innovators, venture investors and the supporting ecosystem
- Drive deal flow by positioning and promoting your organization as a cleantech leader to CEOs, corporate strategy executives, leading technology innovators, and business unit decision makers.
- Associate your brand with the world's most important industry event of the year, identify new clients, and enhance visibility.

Becoming a sponsor of Cleantech Forum Europe is the most targeted and effective way for you to reach the European cleantech innovation community.

Sponsor Levels

All our sponsorship agreements are tailored in order to align closely with your Forum objectives.

Sponsorship agreements can be built up by reviewing the range of possible benefits, as outlined below, and matching them to suit different objectives and different budget levels. Alternatively, you can review a sample of standard Forum sponsorship packages provided in **Appendix 1**.

Our standard sponsorship packages are broken into several levels, as follows:

Platinum €22,500

Gold €15,000

Silver €10,000

Bronze €5,000

The cost of the final sponsorship package will depend on the final agreed package of benefits.

Sponsor Benefit Options

The menu of benefits and associated costs are outlined in the following pages. We work with our sponsors to customize these elements to suit their purposes.

Main Stage Time

Subject to editorial approval, some sponsors can be guaranteed main-stage time, be that as a 15-minute keynote type contribution, or as a shorter (5-7 minute) spotlight (typically used for key announcements and partnership case studies, to alert our audiences to examples of what you have done and wish to do more of).

*Note: We are highly selective for our main-stage agenda - only those sponsors deemed by Cleantech Group to have exemplary content that is of interest to a large proportion of our audience will be considered.

Co-hosting a Session on the Forum Agenda

This activity would allow the sponsor to co-create a session on the Forum agenda with CTG that is of strong interest to both the sponsor and the Forum attendees.

The most common activity involves co-creating one of our standard 60-minute parallel sessions.

Another possibility is to co-create and host a breakfast or a lunch session.

*Note: CTG retains ultimate editorial control over all agenda items, and works with session co-hosts to ensure all sessions are impactful and in line with the Forum themes and audience interests - while ensuring the sponsors remain comfortable and satisfied with the final product.

Running a Workshop or a Tutorial

This activity would allow the sponsor, subject to CTG's agreement that it is a good fit for our Forum, to run a side event (hosted in rooms with capacities of 20-40 people). The two typical formats are:

- Interactive Workshops (up to 40 minutes of content time)
- Tutorials (up to 20 minutes of content time) designed for a single speaker (typically) to have the opportunity to go more in-depth on a very specific subject.

Sponsor Benefit Options Continued...

Establishment of One-on-One Meetings and Private Meeting Rooms

CTG will work with the sponsors to understand with which particular individuals they would like to have private meetings. CTG will then aim to secure and schedule selected one-on-one meetings with these particular contacts at the event. To determine a meetings schedule, CTG will collaborate with the sponsors on highest priorities and most appropriate meeting targets in the run-up to the Forum.

Subject to availability - either as an addition to scheduled meetings or an alternative sponsor benefit - private meeting rooms can be reserved.

Exhibit Space

Forum exhibit spaces are placed in the main networking area of the Forum and therefore benefit from high foot traffic throughout the event. The space can be used how the sponsor wishes, as long as it is relevant to the Forum delegates. Examples of how the Forum space tends to be used include: distributing materials, display of products, a dedicated area to set up one-on-one meetings, branding and advertising.

Forum Receptions or Tailored Networking Activity

We have two evening receptions (Opening Night and Closing) that sponsors can host, allowing you to address the crowd and invite people to speak with you during the reception.

There is also an option to sponsor an invitation-only activity organized by CTG (e.g. dinner, lunch, cocktail). CTG would invite and confirm selected delegates based on the sponsor's preferences (such as particular investors, corporations, entrepreneurs) and provide the sponsor with the appropriate ambience and format for valuable introductions and networking time. Activities can be located at the main Forum venue or in a separate private space.

Other Options

CTG will customize sponsorship packages to suit your objectives and budgets. Examples of other sponsorship benefits that could be included in your package are:

- Host a round-table discussion during the general networking lunch
- Exclusive Sponsor of the Cleantech Forum's Program Guide
- Exclusive Sponsor of the Cleantech Forum Event App
- Co-host of the invite-only Investors' Dinner

Marketing Benefits

	Platinum	Gold	Silver	Bronze
Premium Exhibit Space in the General Networking Area	YES

2018 Cleantech Forum Europe Venues

The City of Antwerp

Antwerp is Flanders' largest city and economic driving force. Industry, with the Antwerp chemical cluster in the vanguard, is one of the city's main economic pillars. At the same time, the city boasts a diverse and high-performing service industry.

Antwerp is a pioneer in the New Industrial Policy of Flanders. The emphasis is on sustainable chemistry; innovative and smart logistics; and creative economies, among others. Antwerp Headquarters attracts head offices of logistics companies, shipping companies, (petro) chemical companies and major maritime service providers, such as lawyers, banks and insurers.

Flanders Meeting & Convention Center Antwerp

Koningin Astridplein 20-26 | B-2018 Antwerp | Belgium

The new **Flanders Meeting & Convention Center Antwerp** combines the best of two worlds. State-of-the-art facilities and technology are integrated in the breathtaking façade of the rooms that have been there for decades.

An international magnet with unique assets, this wonderful location is truly a stunning development, created with sustainable materials and designed to be highly energy efficient.

FMCCA is part of the world's best kept 19th century zoo, and is located right next to a modern international transport connection housed in 19th century marble splendour.

The New Palace of Justice

Bolivarplaats 20 | 2000 Antwerpen | Belgium

The 14th annual Cleantech Forum Europe Gala Dinner & Awards Ceremony will take place at the **New Palace of Justice**. The New Palace of Justice/Antwerp Courthouse, nicknamed “the Butterfly Palace”, is a building in the south of Antwerp, near the Bolivarplaats. It was designed by the British modernist architect Richard Rogers, who is also the creative brain behind famous buildings as the Centre Pompidou (Paris) and the Millennium Dome (London). The Palace of Justice in Antwerp is commonly considered to be one of Belgium’s 21st century architectural highlights.

About Cleantech Group

Founded in 2002, the mission of Cleantech Group (CTG) is to accelerate sustainable innovation. Our subscriptions, events and programs are all designed to help corporates, investors, and all players in the innovation ecosystem discover and connect with the key companies, trends, and people in the market. Our coverage is global, spans the entire clean technology theme and is relevant to the future of all industries. The company is headquartered in San Francisco, with a growing international presence in London.

Our parent company, Enovation Partners, one of *Consulting Magazine's* 7 to Watch, is based in Chicago (learn more at www.enovationpartners.com).
