

Adrian Corless,
Chief Executive Officer,
Carbon Capture Inc.

Adrian has spent over 25 years developing and commercializing products in the cleantech industry. From 2013 to 2018, he was the CEO of Carbon Engineering, where he successfully developed the company into a recognized global leader in CO₂ direct air capture, piloting industrial scale systems in under two years. In addition, Adrian has spent 15+ years commercializing industrial hydrogen, fuel cell, and pump technologies, serving as CEO of Rotoliptic Technologies, CTO of Plug Power, and CTO of Cellex Power Products. He holds a Master of Science degree from the University of Victoria, BC Canada with specialization in Energy Systems, Cryogenics, and LNG.
