

Breanne O'Reilly

COO,
International CCS
Knowledge Centre

As Chief Operating Officer at the International CCS Knowledge Centre, Breanne O'Reilly oversees daily operations, ensuring efficient delivery of technical and strategic services. Her responsibilities include developing strategic plans, managing budgets, overseeing proposal development, and mentoring a high-performing operations team.

Breanne spearheads transformative initiatives to advance carbon capture and storage (CCS) solutions across Canada. She is dedicated to positioning the Knowledge Centre at the forefront of sustainable development, aligning it with Canada's carbon reduction goals. Her expertise in consulting and communications, coupled with her strategic leadership, drives the organization's efforts in knowledge-sharing activities and securing new funding opportunities.

With a career dedicated to understanding Canada's evolving energy landscape, Breanne has built collaborative relationships and shared valuable information with industry, government, and the public. Her strong foundation in public relations and extensive experience enable her to combine strategic thinking with hands-on expertise, driving meaningful change in the pursuit of a low-carbon future.
